SPECIALS

SHIATSU
Shiatsu (finger press) is a form of body therapy originating in Japan. The massage technique consists of soft, rhythmic, far-reaching stretches and rotations. The aim of Shiatsu is to simulate individual parts of the body and to mobilise the muscles.

2D MASSAGE
The intelligent 2D massage mechanism allows the massage chair to measure your back to determine a more exact position of the sections of the spine.

KNEADING
Skin and muscles are either clasped and kneaded between the thumb and the index finger or with both hands. This massage technique is used in particular to ease tension.

FLAP
Circulation in the muscles is stimulated and the tendons are encouraged to stretch by means of light tapping with a cupped hand, which also reduces tension at the same time.

TAPPING
Short, tapping movements are performed with the edge of the hand, the palm or the fist. This promotes blood circulation in the skin and softens tense muscles. If tapping is performed at lung height, this can improve the release of mucus in the lung.

KNEAD & FLAP
A massage combination of kneading and flapping.

BACK STRETCH ROLLING
Targeted stretch massages activate the body and have an invigorating effect on the whole body.

ROLLING
Pleasant alternation between relaxation and releasing the muscles – also perfectly suited for a final massage, for relaxation and recovery of the muscles.

CARBON HEATING
Deeply penetrating Carbon infrared heat, blood vessels expand, the blood flow increases and the muscle tone is reduced. In addition, it carries out a highly beneficial effect on nerve cells, which are responsible for reporting pain to the brain.

GUA SHA
The scraping of -GuaSha- with slight pressure opens superficial blood vessels and stimulates blood circulation. GuaSha is often applied in combination with acupressure „shu points“ to bring additional stimulation to relieve ache symptoms.

AIR COMPRESSION
Rising and receding airbags have a pumping motion which produces natural muscle reflexes. This is particularly beneficial in the calf and foot area.

ARTHROSE TRACTION
Arthrose Traction is a gentle stretching and pressure. This stimulates the cartilages, so that liquid transport is stimulated, nutrients are better received and Arthrose symptoms can be alleviated.

L-SHAPE
You can expect a profound full body massage from the neck down to the buttocks.

S-LINE
With this automatic program the massage heads are working very close to your body, they massage the whole back down to your buttocks. The S-shaped mechanic is constructed after the natural anatomy of the spine.

ZERO SPACE
For the lying-position the massage chair moves forward and therefore requires very little distance to the wall behind. Space saving and comfortable!

ZERO GRAVITY
You put yourself in the position of an astronaut – that “weightless feeling”.

ADJUSTABLE PILLOW
If necessary, the double cushion can be placed to reduce the neck and shoulder massage intensity.

AUTOMATIC
8 specifically developed automatic programmes for the whole body, which offer a big range of different massage techniques. Additionally

MEMORY
Using the intelligent memory function the massage chair remembers your favourite massage exactly and begins immediately without a scan. You have the opportunity to save two programmes with different buttons (M1 & M2).

BACK AREA
An individual applicable to any size massage area.

ADJUSTABLE FOOTREST
The footrest can be extended, this way it is adaptable to different body sizes.

ADJUSTABLE PILLOW
If necessary, the double cushion can be placed to reduce the neck and shoulder massage intensity.

RECLINING POSITION
The adjustability of the backrest and footrest contributes to personal well-being of the body position.

ADJUST SHOULDER
The massage heads can be moved upward or downward to a suitable position in the shoulder area.

AIR INTENSITY
Adjustable airbag massage intensity.

AIR AREA
Three air pressure modes (full body, arm and leg / lower body).

SPOT
The massage heads can massage a particular spot.

SPEED
Massage speed is adjustable.

WIDTH
The distance between the both massage heads can be set (narrow, medium and wide).

ACUPRESSURE POINTS
Eight key acupressure points on the thighs, calves and ankles are massaged.

MUSIC
Further relaxation and fun with the music function.

BLUETOOTH
Wireless data transmission.

MASSAGE HANDS FEELING
Specially designed massage heads imitate the hand motion of a professional masseur. The maximum stretch space is 6,5 cm, and the maximum stretch angle is 41 degrees, so the mechanical hands can do effective massage to human cervical vertebra thoracic vertebra and lumbar vertebra.

USB-CHARGER
While you relax, the integrated USB port can supply, for example, your phone with power.

QUICK START
With one touch the quick start buttons in your armrest allow you to control the most important functions.

TECHNICAL DATA

Dimensions upright	81 x 119 x 147 cm
Dimensions reclining	81 x 92 x 176 cm
Weight	96 kg
Voltage	220-240 V ~ 50/60 Hz
Nominal power	150 W
Rated runtime	20 minutes
braintronics	21 minutes
Certificates	

Width of seating area 50 cm | Width of shoulder area (inside) 60 cm

ALPHASONIC II

MASSAGE CHAIR

AVAILABLE COLOURS

CLASSY DESIGN AND WONDERFUL RELAXATION

The next step towards perfection – **AlphaSonic II** from **Casada**

The **AlphaSonic II** combines state-of-the-art technology with tried-and-tested/proven quality and offers a completely new way to experience relaxation. The new premium massage chair from the Casada family impresses with a larger seat and a striking, creative design. Durable and environmentally friendly microfiber PU

leather does not only feel good, but also facilitates cleaning and ensures exceptional seating comfort. With the quick start panel located in the armrest, all basic functions are easily controllable, and you can simply put the remote control aside. Dream away, take a break from the life's daily hassles and allow body and mind to relax.
